**2018 FAMILY PRICING GUIDE**

## *About Me*

CHRISTINA PARKER

Most school days, you can find me surrounded by small children, that call me, by my childhood name, "Miss Chrissy". I have a camera in my hand, as I teach and take daily photographs at my own preschool, called "Playtography".

I love a hot bath, just for the chance to warm up and read a good book. I am a wife to my super supportive and marathoner husband Mike, and a mom to our four children.

I am always up for an adventure, especially if it involves driving across America, or on a roller coaster at DisneyWorld. I love the warm Spring wind, rainy days and puddles to jump in.

My photography style is playful, with natural expressions and connections. I also have some candy for incentives!

I want you to cherish your portraits now and for generations to come.

## **Portrait Order Worksheet**

Please take the time to complete this worksheet and bring it with you to your viewing appointment.

### **Displaying Portraits in your home**

It is a common mistake for consumers to think an 8x10 is a standard enlargement size. I encourage you to think larger with your personal portrait collection. Portraits starting at 11" are a mini wall portrait size, meaning that the portrait is best viewed from a distance of 3 feet, which is a comfortable distance for a viewer to stand from the wall. Think of the impact that a large wall portrait will have on guests in your home. A 20" portrait is a standard size that makes a statement and draws the viewer in from across the room to "take in" the image. Gift Prints (up to 8x12) on a wall draws the viewer closer, simply because they can not see the image from a distance. Gift Prints are best used by placing in a small grouping with other gift prints in a frame, on a desktop or on a shelf.
